MEMORANDUM FOR: Chief, Military Economic Division, ORR

ATTENTION :

25X1

FROM :

Chief, CIA/PID (NPIC)

SUBJECT :

Probable New-Type Submarine and Electronics Ship
at Vladivostok

1. This memorandum concerns more detail about the probable new-type submarine and the probable new-type electronics ship located at the Vladivostok Naval Base and Shipyard 202. These vessels were analysed and discussed with you on your visit to NPIC with PID Analysts [redacted] on 26 June 1963.

25X1

2. Preliminary photo analysis reveals the presence of two probable new-type submarines berthed along side a fitting-out pier, 1,000 feet SE of the graving dock located at 43° 06' 40"N - 131° 54' 42"E. Both of the submarines have an approximate length of 420 feet. This measurement has been corroborated by the Technical Intelligence Division (TID), NPIC. These measurements have a plus or minus (+) factor of 10 feet.

3. The probable new-type electronics ship appeared to be similar to information you have which was released by the USSR. The ship is approximately 440 feet long and has an approximate beam of 70 feet. These TID measurements further corroborates your measurements.

4. The photography used in this analysis was from Satellite [redacted]

25X1

[redacted] The map reference used was U.S.A.T.C. Series 25, Sheet 0291-9999-3-25A, Scale 1:25,000, 2nd Ed., July 1960, SECRET.

5. The analysts assigned to this project were [redacted] and [redacted]

25X1

Should any further questions arise concerning this memorandum, they may be contacted directly on extensions [redacted] respectively.
